

BUILD A

7 FIGURE MINDSET

DOJO GAINS - Mentorship

The Mental Game of Trading

Why Mindset Matters

- Trading is 80% psychology, 20% strategy
- Your emotions are your biggest enemy
- Most traders fail not from bad strategies, but bad discipline
- The market is designed to exploit human psychology
- 7-figure traders think differently than retail traders

The Losing Trader Mindset

- Trades emotionally - revenge trades after losses
- Thinks every trade must be a winner
- Moves stop losses to avoid taking losses
- Over-leverages to 'make back' losses
- Blames the market, brokers, or others
- Chases trades and enters without a plan
- Can't walk away from the screen

Recognize these patterns? Time to change.

The Winning Trader

- Accepts losses as part of the business
- Focuses on process, not individual outcomes
- Follows the plan no matter what
- Takes responsibility for every trade
- Stays patient - waits for A+ setups
- Protects capital above all else
- Knows when to step away

This is the mindset that builds wealth

Think in Probabilities

- No single trade matters - it's the SERIES that counts
- A 60% win rate means 40 losses per 100 trades
- You can lose 5 trades in a row and still be profitable
- Each trade is just one sample in a large dataset
- Remove emotion by thinking statistically
- Focus on expected value, not individual results

Think like a casino, not a gambler

Process Over Outcome

- A good trade can lose money
- A bad trade can make money
- Judge yourself on EXECUTION, not P&L
- Did you follow your rules? That's a good trade.
- Did you break your rules? That's a bad trade - even if it won.
- Consistent process = consistent results over time

The process is the prize

Handling Losses Like a Pro

- Losses are tuition - you're paying to learn
- Every loss teaches you something
- Take the loss, journal it, move on
- NEVER revenge trade - walk away if emotional
- Set a daily loss limit (e.g., 2-3% max)
- Hit the limit? You're done for the day. No exceptions.

Building Unshakeable

- Create a trading plan and follow it religiously
- Use a pre-trade checklist before every entry
- Set rules for max trades per day
- Take breaks - trading is mentally exhausting
- Journal every trade - winners AND losers
- Review weekly - what did you do well? What to improve?

Playing the Long Game

- 7 figures isn't built in a day, month, or even year
- Focus on consistent small gains, not home runs
- Compound your account - 1% per day = 1,200%+ per year
- Protect your capital during learning phase
- The goal is to STAY in the game long enough to master it
- Most quit right before they would have succeeded

Daily Habits of 7-Figure

- Morning routine: Review markets, mark levels, set plan
- Only trade during their best hours (Killzones)
- Take breaks every 90 minutes
- Exercise and stay physically healthy
- Journal every trade same day
- End of day review: What worked? What didn't?
- Continuous education - never stop learning

Trader Affirmations

I am a disciplined trader.

I follow my plan no matter what.

Losses are part of the game.

I think in probabilities, not certainties.

I protect my capital above all.

I am patient. The setup will come.

I am building generational wealth.

Read these every morning before trading

Key Takeaways

- Mindset separates winners from losers
- Think in probabilities, not certainties
- Process over outcome - always
- Losses are tuition, not failure
- Discipline is your superpower
- Play the long game - compound wins

Your mind is your edge
